The extended abstract is a one-page abstract and is considered a preview of the full text of the paper. It should give the reader a more in-depth outline of the topic of the publication and thus introduce the reader to the methods, results and conclusion. It should therefore include text, figures and mathematical expressions that the authors consider essential to be included in the abstract. It is not necessary to give the titles of all chapters and subchapters that appear in the full text of the paper. The page layout, format of bulleted text, mathematical notations and figures, including tables, is identical to that of the full text.
